Head And Neck Surgery
Facial Plastic Surgery
Allergy, Asthma, Immunology

Medications To Avoid Before Surgery

The following is a partial list of products, which contain aspirin, salicylates or other components, which can cause bleeding if taken before surgery. Please avoid these before and after surgery. Most nonsteroidal anti-inflammatory medications (NSAIDS), arthritis and pain medications can cause bleeding. If you are not sure about which medications to avoid before surgery, please call our office at (203) 259-4700.
